

KILIMANO Project

Project Scope:

A system to manage Clients, where each Client can have multiple Projects. A project is a physical location that require a Government Permit to operate. The system will save those Permits and will issue several alerts when the Permits are going to expire, 2 months before, 1 month before, 2 weeks, 1 week, and the 3 last days. This system will have the three components like all other ZASPY Projects, Internet Page, Intranet and Extranet for Clients.

Database Structure:

Here are the main Tables needed for this projects in terms of Client, their Projects and Projects Alerts. Other tables are needed but those you can copycat from other Zaspy Project to manage Menu Categories, Submenus, SlideShows and Images. The Intranet menu can be Administrators | Edition | Menu | Clients | Reports. In the Edition menu add CK Editor Pages for the Home Page and Footer.
